Historic Preservation

Chad Randl, Interim Program Director
503-412-3718
70 NW Couch Street, Floor 4R
Portland, Oregon 97209

The University of Oregon’s Historic Preservation Program is best
described as having broad cultural concerns with a technical emphasis.
Attention is given to historic places, buildings, and landscapes in terms
of their specific forms, materials, construction, and use. The cultural
and theoretical context in which they were developed is addressed, as
is the impact of time upon their materials, meanings, and needs. The
technologies, interpretations, and means for sustaining the presence of
historic places in the future are also emphasized.

Students gain an understanding of historic resources and the processes
for their preservation. This includes core courses in research methods,
preservation history and theory, architectural history, and the economic,
legal, and administrative processes of preservation. Students choose
from three focal areas:

1. sustainable preservation theory, design, and technology
2. cultural resource management
3. resource identification and evaluation

Other focal areas are feasible but must be approved in advance by the
submission of a curriculum plan by the student by the second term of the
student’s first year.

Courses are augmented by fieldwork in the urban, suburban, and
rural areas of the region. Oregon contains Native American sites, rural
buildings and landscapes developed by U.S. and European immigrant
pioneers from the 1830s, as well as urban development since the 1840s.
More recent transformations of the landscape by various ethnic groups
and technological innovations are also explored. Extensive instructional
use of the region takes place through an emphasis on the cultural and
technical aspects of vernacular resources, field trips, participation in
projects at the university, and through local community groups. There
is also frequent involvement with the area’s professionals, officials, and
agencies concerned with historic resources.

Recent opportunities for experience include window restoration and
traditional earth construction workshops, documentation for a Historic
American Buildings Survey for the Alaska Regional Office of the National
Park Service, U.S. Department of the Interior; a preservation field
guide for the community of Ebey’s Landing National Historical Reserve;
a condition assessment and stabilization of Gilbert’s Cabin in North
Cascades National Park; a condition assessment of Frank Lloyd Wright’s
Usonian Gordon House in Silverton, Oregon; the documentation of the
Finney House frontier cabin in Nevada City, Montana; the limestone
roof replacement on a late sixteenth-century stone cottage on the island
of Drvenik Veli, Croatia; and the reconstruction of the Ferry House
porch in Ebey’s Landing National Historical Reserve, Whidbey Island,
Washington.

In addition to providing hands-on training in what might be considered
mainstream preservation activities, the program emphasizes the
importance of cultural conservation including issues of diversity, identity,
and community development. This includes a concern not only for how
various ethnic groups shaped buildings and landscapes in the distant
past, but how similar settings are reproduced by cultural groups in

Beyond completing core and focal area courses, each student is
required to complete individualized study, including reading and thesis
research, a summer internship, and a thesis or terminal project. Some
former students have chosen to develop specialties and concurrent
master’s degrees in closely related fields such as architecture, landscape
architecture, and planning, public policy and management; others
have created more unique combinations with studies in museums,
economic development, and Russian, East European, and Eurasian
studies. Besides encouraging students to develop an individualized
course of study, the program is characterized by students who exhibit
self-motivation and individual initiative. These traits, which are not
only expected but are also necessary for successful completion of the
program, contribute to the professional growth of students. Graduates of
the Historic Preservation Program are employed in preservation-related
fields over a wide geographic area. Some choose to pursue work in the
private sector as specialists in architectural offices or as consultants.
Others serve in the public sector with municipal planning departments,
state historic preservation offices, or federal cultural resources divisions.
Some graduates choose to work with nonprofit agencies, while others
select careers in preservation and restoration.

Faculty

Christopher Bell, instructor (historic preservation). BA, 1998, Williams;

James Buckley, associate professor; Venerable Chair in Historic
Preservation. BA, 1982, Yale; MCRP, 1986, PhD, 2000, California,
Berkeley. (2016)

Elizabeth Carter, instructor (historic preservation). BA, 1988, MS, 1994,
Oregon. (2005)

Eric L. Eisemann, instructor (legal issues). BA, 1974, Knox; MA, 1980,
Western Kentucky; JD, 1994, Lewis and Clark. (1984)

Kingston Heath, professor (historic preservation). BA, 1968, Lake Forest;

Rick Minor, courtesy adjunct instructor (archaeology). BA, 1972,

Suzana Radivojevic, adjunct instructor (wood science). BScFE, 1997,
Belgrade; PhD, 2006, Toronto. (2013)

Kirk Ranzetta, instructor (historic preservation, planning). BA, 1994, Mary

The date in parentheses at the end of each entry is the first year on the
University of Oregon faculty.

Participating

Howard Davis, architecture

Keith Eggener, history of art and architecture

Mark Eischeid, landscape architecture

Mark Gillem, architecture

Maile Hutterer, history of art and architecture
Historic Preservation

Renee A. Irvin, planning, public policy and management

Robert L. Thallon, architecture

Jenny Young, architecture

• Minor

Undergraduate Studies

Important note: The Historic Preservation Program is not currently accepting new undergraduate minors during the restructuring of the School of Architecture and Allied Arts into the College of Design.

Historic preservation is an inherently interdisciplinary field. The minor is particularly well-suited for students studying anthropology, architecture, history, the history of art and architecture, landscape architecture, and planning, public policy and management. Undergraduate students, no matter their major, are eligible to enroll in the minor, however.

The interdisciplinary minor in historic preservation requires a minimum of 27 credits as described below. The lowest accepted passing grade for courses used to complete the undergraduate minor in historic preservation is a C– or better. Some courses required for the minor are only offered every other year.

Total Credits: 27

Courses from other university departments may be substituted with approval of the program director.

To declare the minor, please complete the undergraduate minor intent form (http://hp.uoregon.edu/sites/hp.uoregon.edu/files/downloads/HP%20Minor%20Intent%20Form%202013.pdf) and schedule an advising appointment with the program director, James Buckley (jbuckley@uoregon.edu), to clarify your goals for enrolling in the program and map out your curriculum. Once complete, submit your signed intent form to the program office.

• Master of Science

Graduate Studies

The program offers a master of science (MS) degree in historic preservation. Although no particular training is preferred, students whose backgrounds are primarily in historic preservation, architecture, landscape architecture, and architectural history are most prepared for this program. Course work includes training in the social sciences, preservation theory and law, the characteristics of historic buildings and landscapes, historic building technology, and the procedures for evaluating and recording historic sites and buildings.

The program is administered by the Historic Preservation Committee, an interdepartmental committee in the School of Architecture and Environment.

Admission

Applications to the graduate program should contain the following:

1. Completed online application and fee
2. Biographical summary
3. Educational and professional summary
4. Statement of intent
5. Selected examples of written material, graphic work, or both
6. Official transcripts of all college work
7. Three letters of recommendation, preferably from academic or professional sources

Students whose first language is not English must submit Test of English as a Foreign Language (TOEFL) scores of at least 88.

Students who want to participate in the program through the Western Regional Graduate Program (WRGP) should inquire at the historic preservation office or the Graduate School.

General university regulations about graduate admission are described in the Graduate School section of this catalog.
The application deadline is January 15 for admission the following fall term. Requests for more information and application materials should be directed to the office staff of the Historic Preservation Program at histpres@uoregon.edu. Information is also available on the program website.

Master of Science Requirements

The MS degree in historic preservation requires 73 credits in five areas: historic preservation core courses, architectural history core courses, focal area courses, approved electives, and individualized study courses, which include thesis or terminal project, research, and an internship. Students choose one of three focal areas in which to specialize—sustainable preservation theory, design, and technology; cultural resource management; or resource identification and evaluation.

</tbody>
</table>

Total Credits 73

1 Courses must be taken for a letter grade.
2 An internship is included in the Individualized Study requirements.

3 Before enrolling in Thesis (AAAP 503) or Terminal Project (AAAP 611), the student must develop a project proposal and have it approved by a committee of two or more members, at least one of whom must be University of Oregon faculty members. When the thesis or terminal project nears completion, the student must present the results of the project to faculty members and students and gain final approval of the project’s documentation from the faculty committee. Requirements for the final presentation are listed in the current graduate program guide.

Focal Areas

The three focal areas described in this section reflect the particular interest areas and professional careers that are traditionally sought by program graduates. To focus their studies, students select courses from one of the three areas. Those who want to pursue a broader range of interests may select courses from more than one of the focal areas and develop an approved alternative focal area. It is the student’s responsibility to construct such an alternative focal area and present it to the program director for approval no later than the second quarter of the first year of study. A full list of courses for each focal area are available on the program website: hp.uoregon.edu/master-science-degree-requirements.

• Sustainable Preservation Theory, Design, and Technology. Focusing on the practice of preservation, emphasis is placed on the skills needed to research, plan, and direct the restoration and adaptive reuse of buildings, places, and landscapes as well as to determine the appropriate levels of treatment.

• Cultural Resource Management. Embodied in historic preservation is the management of cultural resources. This focal area provides the legal, planning, and management skills needed for individuals to work within organizations that support efforts to manage cultural resources in both the public and private sectors.

• Resource Identification and Evaluation. This focal area reveals the insights and investigative tools for archival and cultural resource research to establish the history and context of buildings, interior spaces, and landscapes that determined settlement, organization, and a sense of place.

AAAP 503 Thesis 3 or AAAP 611 Terminal Project 12

Total Credits 73
AAAP 415. Transportation and Preservation. 3 Credits.
Addresses compliance issues with preservation laws relating to transportation development. Includes understanding processes and negotiating needs of the resource with the needs of transportation authorities.

AAAP 421. American Architecture from a Preservation Perspective I. 4 Credits.
American built environment from the colonial era to the federal period. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 422. American Architecture from a Preservation Perspective II. 4 Credits.
American built environment from the federal period to 1893. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 423. American Architecture from a Preservation Perspective III. 4 Credits.
American built environment from 1893 to the present. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 431. National Register Nomination. 3 Credits.
Provides information and instruction on all aspects of the National Register program and process. Facilitates completion of registration form. Prereq: AAAP 411.

AAAP 435. Historical Archaeology in Preservation. 3 Credits.
Explores the interrelationships between historical archaeology and historic preservation, two fields linked together by common interests in documentation, identification, interpretation, and preservation of heritage resources.

AAAP 438. Building Pathology: Wood. 4 Credits.
Examines scientific fundamentals of material wood properties in building construction and the application of that knowledge to preservation of wood in historic buildings.

AAAP 441. Legal Issues in Historic Preservation. 3 Credits.
Examines constitutional, statutory, and common law affecting historic preservation. Covers First Amendment, eminent domain, due process, police powers, regulatory " Takings," and aesthetic zoning.

AAAP 451. Historic Survey and Inventory Methodology. 3 Credits.
Examines how historic inventories help communities plan for wise use of historic resources. Includes complete reconnaissance and survey documentation for historic properties and development of historic context statement.

AAAP 503. Thesis. 1-12 Credits.
Repeatable.

AAAP 507. Seminar: [Topic]. 1-5 Credits.
Repeatable.

AAAP 508. Workshop: [Topic]. 1-5 Credits.
Repeatable up to five times.

AAAP 510. Experimental Course: [Topic]. 1-5 Credits.

AAAP 511. Introduction to Historic Preservation. 3 Credits.
History, evolution, modern concepts, and professional techniques of historic preservation.

AAAP 515. Transportation and Preservation. 3 Credits.
Addresses compliance issues with preservation laws relating to transportation development. Includes understanding processes and negotiating needs of the resource with the needs of transportation authorities.

AAAP 521. American Architecture from a Preservation Perspective I. 4 Credits.
American built environment from the colonial era to the federal period. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 522. American Architecture from a Preservation Perspective II. 4 Credits.
American built environment from the federal period to 1893. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 523. American Architecture from a Preservation Perspective III. 4 Credits.
American built environment from 1893 to the present. Stylistic development and building analysis for preservation; cultural, historical, and physical contexts within building forms.

AAAP 531. National Register Nomination. 3 Credits.
Provides information and instruction on all aspects of the National Register program and process. Facilitates completion of registration form. Prereq: AAAP 511.

AAAP 535. Historical Archaeology in Preservation. 3 Credits.
Explores the interrelationships between historical archaeology and historic preservation, two fields linked together by common interests in documentation, identification, interpretation, and preservation of heritage resources.

AAAP 538. Building Pathology: Wood. 4 Credits.
Examines scientific fundamentals of material wood properties in building construction and the application of that knowledge to preservation of wood in historic buildings.

AAAP 541. Legal Issues in Historic Preservation. 3 Credits.
Examines constitutional, statutory, and common law affecting historic preservation. Covers First Amendment, eminent domain, due process, police powers, regulatory " Takings," and aesthetic zoning.

AAAP 551. Historic Survey and Inventory Methodology. 3 Credits.
Examines how historic inventories help communities plan for wise use of historic resources. Includes complete reconnaissance and survey documentation for historic properties and development of historic context statement.

AAAP 601. Research: [Topic]. 1-6 Credits.
Repeatable.

AAAP 602. Supervised College Teaching. 1-5 Credits.
Repeatable.

AAAP 604. Internship: [Topic]. 1-9 Credits.
Repeatable.

AAAP 605. Reading and Conference: [Topic]. 1-6 Credits.
Repeatable.

AAAP 606. Special Problems: [Topic]. 1-6 Credits.
Repeatable.

AAAP 607. Seminar: [Topic]. 1-5 Credits.
Repeatable.

AAAP 608. Workshop: [Topic]. 1-5 Credits.
Repeatable.
AAAP 609. Practicum: [Topic]. 1-6 Credits.
Repeatable.

AAAP 610. Experimental Course: [Topic]. 1-5 Credits.
Repeatable.

AAAP 611. Terminal Project. 1-12 Credits.
Repeatable.
