

# Human Physiology (BA/BS)

---

Human physiology is the science of the mechanical, physical, and biochemical function of humans, and serves as the foundation of modern medicine. As a discipline, it connects science, medicine, and health and creates a framework for understanding how the human body adapts to stresses, physical activity, and disease.

Undergraduate students in human physiology complete preparatory science courses in chemistry, biology, mathematics and physics that prepare them for upper level coursework in human anatomy and physiology as well as courses that explore the functional and structural mechanisms underlying human health and performance across the life span. The majority of our students aspire to be professionals in health-science fields such as medicine, physical therapy, nursing, dentistry, pharmacy, education, and research.

## Program Learning Outcomes

Upon successful completion of this program, students will be able to:

- **Content Intellectual Breadth:** Demonstrate content knowledge and understanding of terminology, concepts, and relationships in human anatomy and physiology.
- **Inquiry:** Utilize a broad foundation of anatomical relationships and physiological principles in analysis, application, and synthesis related to human physiology and pathophysiology.
- **Critical Thinking:** Critically evaluate scientific information to help make decisions with respect to personal health, clinical applications, and research in human physiology.
- **Life-long Learning:** Demonstrate life-long learning skills, which include deciding what needs to be learned, articulating a learning plan, and implementing this plan.
- **Communication:** Communicate effectively, to a variety of audiences, in various modes.
- **Ethics Professionalism:** Demonstrate knowledge of ethical and professional behavior related to academic integrity, communication with others, and during individual and cooperative work.

## Program Learning Outcomes with Sub-Outcomes

1. **Content & Intellectual Breadth:** Demonstrate content knowledge and understanding of terminology, concepts, and relationships in human anatomy and physiology.
  - 1.1. Identify problems, articulate questions or hypotheses, and determine the need for information.
  - 1.2. Access and collect the needed information from appropriate primary and secondary sources.
  - 1.3. Use quantitative and qualitative methods, including the ability to recognize assumptions, draw inferences, make deductions, and interpret information to analyze problems in context and draw conclusions.
2. **Inquiry:** Utilize a broad foundation of anatomical relationships and physiological principles in analysis, application, and synthesis related to human physiology and pathophysiology.
  - 2.1. Recognize the complexity of problems and identify different perspectives from which problems and questions can be viewed.

- 2.2. Evaluate and report on conclusions, including discussing the basis for and strength of findings, and identify areas where further inquiry is needed.

3. **Critical Thinking:** Critically evaluate scientific information to help make decisions with respect to personal health, clinical applications, and research in human physiology.

- 3.1. Identify, analyze, and evaluate reasoning and construct and defend reasonable arguments and explanations.

4. **Life-long Learning:** Demonstrate life-long learning skills, which include deciding what needs to be learned, articulating a learning plan, and implementing this plan.

- 4.1. Demonstrate in-depth knowledge and skills in Human Physiology.

- 4.2. Identify the fundamental principles of Human Physiology.

- 4.3. Apply the research methods and theoretical models of Human Physiology to define, solve, and evaluate problems.

- 4.4. Transfer knowledge and skills gained from general and specialized studies to new settings and complex problems.

- 4.5. Demonstrate life-long learning skills, including the ability to place problems in personally meaningful contexts, reflect on one's own understanding, demonstrate awareness of what needs to be learned, articulate a learning plan, and act independently on the plan using appropriate resources.

- 4.6. Achieve success in Human Physiology, including applying persistence, motivation, interpersonal communications, leadership, goal setting, and career skills.

5. **Communication:** Communicate effectively, to a variety of audiences, in various modes.

- 5.1. Demonstrate general academic literacy, including how to respond to needs of audiences and to different kinds of rhetorical situations, analyze and evaluate reasons and evidence, and construct research-based arguments using Standard Written English.

- 5.2. Effectively use the common genres and conventions for writing within Human Physiology.

- 5.3. Prepare and deliver effective oral presentations.

- 5.4. Collaborate effectively with others to share information, solve problems, or complete tasks.

- 5.5. Produce effective visuals using different media.

- 5.6. Apply the up-to-date technologies commonly used to research and communicate within Human Physiology.

6. **Ethics & Professionalism:** Demonstrate knowledge of ethical and professional behavior related to academic integrity, communication with others, and during individual and cooperative work.

- 6.1. Assembling and analyzing a set of sources that students have determined are relevant to the issue they are investigating.

- 6.2. Acknowledging clearly when and how they are drawing on the ideas or phrasings of others.

- 6.3. Learning the conventions for citing documents and acknowledging sources appropriate to the field they are studying.

- 6.4. Examine various concepts and theories of ethics and how to deliberate and assess claims about ethical issues.

- 6.5. Apply ethical concepts and theories to specific ethical dilemmas students will experience in their personal and professional lives.

## Human Physiology Major Requirements

Code	Title	Credits
<b>Lower-Division Requirements</b>		
CH 221 & CH 222 & CH 223 or CH 224H & CH 225H & CH 226H	General Chemistry I and General Chemistry II and General Chemistry III <sup>1</sup> Advanced General Chemistry I and Advanced General Chemistry II and Advanced General Chemistry III	12
CH 227 & CH 228 & CH 229 or PHYS 204 & PHYS 205 & PHYS 206	General Chemistry Laboratory and General Chemistry Laboratory and General Chemistry Laboratory Introductory Physics Laboratory and Introductory Physics Laboratory and Introductory Physics Laboratory	6
BI 211 & BI 212 & BI 213 or BI 281H & BI 282H & BI 283H	General Biology I: Cells and General Biology II: Organisms and General Biology III: Ecology and Evolution (may substitute BI 214 for BI 213) Honors Biology I: Cells, Biochemistry and Physiology and Honors Biology II: Genetics and Molecular Biology and Honors Biology III: Evolution, Diversity and Ecology	15
MATH 246 or MATH 251	Calculus for the Biological Sciences I <sup>1</sup> Calculus I	4
PHYS 201 & PHYS 202 & PHYS 203 or PHYS 251 & PHYS 252 & PHYS 253	General Physics and General Physics and General Physics Foundations of Physics I and Foundations of Physics I and Foundations of Physics I	12
HPHY 211	Medical Terminology	3
HPHY 212	Scientific Investigation in Physiology	4
<b>Upper-Division Requirements</b>		
HPHY 321	Human Anatomy I <sup>2</sup>	5
HPHY 322	Human Physiology I <sup>2</sup>	5
HPHY 323	Human Anatomy II <sup>2</sup>	5
HPHY 324	Human Physiology II <sup>2</sup>	5
HPHY 325	Human Anatomy and Physiology III <sup>2</sup>	5
HPHY 371	Physiology of Exercise	4
<b>Upper-Division Electives</b> <b>16</b>		
Select at least two of the following:		
HPHY 333	Motor Control	
HPHY 362	Tissue Injury and Repair	
HPHY 374	Clinical Electrocardiography and Exercise	
HPHY 375	Metabolism and Nutrition	
HPHY 381	Biomechanics	
HPHY 399	Special Studies: [Topic]	
ANTH 362	Human Biological Variation	
ANTH 366	Human Osteology Laboratory	
ANTH 369	Human Growth and Development	
BI 309	Tropical Diseases in Africa	
BI 320	Molecular Genetics	
BI 322	Cell Biology	
BI 358	Investigations in Medical Physiology	

BI 360	Neurobiology	
CH 360	Physiological Biochemistry	
CH 462	Biochemistry	
Select at least one of the following capstone courses:		
HPHY 412	Sleep Physiology	
HPHY 413	Muscle Structure, Function, and Plasticity	
HPHY 414	Muscle Metabolism	
HPHY 422	Physiology of Obesity	
HPHY 423	Physiology of Aging	
HPHY 432	Neural Development	
HPHY 433	Neurophysiology of Concussion	
HPHY 434	Movement Disorders	
HPHY 436	Clinical Neuroscience	
HPHY 444	Clinical Anatomy	
HPHY 462	Therapeutic Techniques	
HPHY 470	Environmental Physiology	
HPHY 473	High Altitude Physiology and Medicine	
Select any of the following:		
HPHY 401	Research: [Topic]	
HPHY 403	Thesis	
HPHY 404	Internship: [Topic]	
HPHY 405	Special Problems: [Topic]	
HPHY 406	Practicum: [Topic]	
HPHY 408	Workshop: [Topic]	
HPHY 409	Terminal Project (Anatomy and Physiology Teaching Assistant)	
HPHY 411	Scientific Teaching	
HPHY 420	Human Anatomy Dissection	
<b>Total Credits</b>		<b>101</b>

<sup>1</sup> Should be taken in the first year.

<sup>2</sup> Must be taken in residence at the University of Oregon.

Courses required for the major must be taken for letter grades and passed with grades of C- or better. Additional requirements for the bachelor's degree are described in the **Bachelor's Degree Requirements** section of this catalog.

## Honors

To apply to graduate with departmental honors, a student must have a GPA of 3.50 or better in courses applied toward the human physiology degree requirements and complete an honors thesis under the supervision of a human physiology thesis committee. In addition, human physiology majors enrolled in the Robert Donald Clark Honors College at the University of Oregon are eligible to complete an honors thesis through that program.

## Four-Year Degree Plan

*The degree plan shown is only a sample of how students may complete their degrees in four years. There are alternative ways. Students should consult their advisor to determine the best path for them.*

*The bachelor of science is shown below. A bachelor of arts in human physiology may be earned by completing (or demonstrating proficiency in) two years of a foreign language.*

**Bachelor of Science in Human Physiology**

Course	Title	Credits	Milestones
<b>First Year</b>			
<b>Fall</b>			
MATH 112Z	Precalculus II: Trigonometry <sup>1</sup>	4

<sup>1</sup> Students not starting in Precalculus II: Trigonometry (MATH 112Z) may require additional terms to graduate.

4 Human Physiology (BA/BS)

<sup>2</sup> To complete general-education requirements within eight courses, students must take arts and letters or social science group-satisfying courses that also satisfy multicultural requirements.

<sup>3</sup> List A and List B options may be found online. (<https://cas.uoregon.edu/physiology/undergraduates/major-requirements/>)
