Anthropology, the study of humans, includes sociocultural anthropology, biological anthropology, and archaeology. Courses offered by the Department of Anthropology span the natural sciences, social sciences, and humanities and provide a broad understanding of human nature and society for students in other fields and for anthropology majors.

The broad perspective on human culture and biology that anthropology offers can enhance studies in many other fields, including history, psychology, international studies, environmental studies, ecology and evolution, geography, earth system science, literature, political science, folklore, language study, art history, and public policy and management.

Undergraduate Studies

Preparation

High school students planning a major in anthropology should have a sound background in English, biological science, and mathematics (preferably algebra). Study in a modern second language is desirable.

Students transferring with two years of college work should have introductory course work in the social sciences. Introductory biology and the equivalent of two years of college-level study in a second language are recommended.

Careers

A bachelor’s degree in anthropology prepares the graduate for employment in areas where clear communication, analysis and synthesis, and respect for diversity are valued. Anthropology provides a suitable background for positions with federal, state, and local agencies and prepares the student for citizenship in a multicultural world.

Students seeking work as professional anthropologists should plan for advanced degrees in anthropology. Graduates with master’s or PhD degrees may find work in government, community colleges, or museums. For university teaching and research careers, a PhD degree is necessary.

Bachelor’s Degree Requirements

The department offers course work leading to bachelor of arts (BA) and bachelor of science (BS) degrees. Major requirements are the same for each. Differences between the two degrees are explained under Requirements for Bachelor of Arts and Bachelor of Science (http://catalog.uoregon.edu/bachelorrequirements/#babsrequirements) in the Bachelor’s Degree Requirements section of this catalog.

Middle and Secondary School Teaching

Careers

The College of Education offers a fifth-year program for middle-secondary teaching licensure in social studies. This program is described in the College of Education section of this catalog.

- Master of Arts
- Master of Science
- Doctor of Philosophy

Graduate Studies

Three advanced degrees are offered in anthropology: the master of arts (MA), the master of science (MS), and the doctor of philosophy (PhD). These degrees entail work in the following subfields: archaeology and cultural or physical anthropology.

Graduate students must demonstrate competence in three subfields, typically through work at the master’s level.

Graduate students are members of the Association of Anthropological Graduate Students and are represented in the Student Senate.

2 Courses must be in subfields of archaeology and cultural or physical anthropology. Some examinations may be required. A master’s paper is required, but a thesis is not required.

The MS requires some second-language training, and who can demonstrate evidence of a sincere interest in the field. It typically takes two years to complete the program.

PhD Degree Requirements

Admission to the doctoral program is contingent on the possession of a valid master’s degree in anthropology from a recognized institution or on the completion of three of the master’s core courses. Those who enter with a master’s degree in another discipline take master’s core courses early in the program.

Formal requirements of time and credit are secondary, but no candidate is recommended for the degree until the minimum Graduate School requirements for credits, residence, and study have been satisfied.

The department requires competence in two modern second languages, one language and one skill, or two skills (including those earned for an MA or MS) approved by the department’s faculty. The student’s progress is measured by performance in the core courses, course work, and research papers; two comprehensive examinations covering two special fields of concentration in anthropology; a formal dissertation prospectus; and, finally, a doctoral dissertation. The dissertation should be based on original research, which ordinarily involves fieldwork or laboratory work, and should be written in a professional and publishable style appropriate to the subfield of specialization.
For information about general requirements, see the Graduate School section of this catalog. More information about programs in anthropology may be obtained from the department.

**Museum of Natural and Cultural History**
The Museum of Natural and Cultural History and its research division, the Oregon State Museum of Anthropology, provide opportunities for students to gain research experience through field projects and museum experience through the natural history museum’s public programs. The rich resources of the state museum’s collections are available to anthropology students, faculty members, and other qualified researchers. The Museum of Natural and Cultural History is described in the Academic Resources section of this catalog; the Oregon State Museum of Anthropology is described under Research Centers and Institutes (http://catalog.uoregon.edu/research).
